

## **A Doctoral and Post-doctoral Training Program**

**Sponsor:** Nanjing University of Information Science and Technology

**Period:** 2011-2015

**Funding Level:** US\$400,000

The main objective of this program is to provide training of doctoral and post-doctoral scientists for Nanjing University of Information, Science and Technology (NUIST). This education initiative is part of a larger collaborative project between NUIST and the Yale School of Forestry and Environmental Studies (YFES). NUIST has a world-class program on atmospheric sciences. Its environmental program, although relatively new, is rapidly gaining status as a leading program in China. NUIST is located in the capital of Jiangsu Province, a province that produces the highest GDP of the country and also faces numerous environmental challenges.
